PROFILE

I'm a passionate Full-Stack developer with about 3 years of experience, always bringing enthusiasm to my work. I'm known for taking full ownership of multiple projects, ensuring they're delivered with accountability, and I love collaborating closely with diverse teams to build apps quickly. As a cooperative team player, I have a knack for picking up new skills fast and adapting to whatever challenges come my way.

WORK EXPERIENCE

Full Stack Developer

The Cloud Play

11/2024 - Present

Faridabad, Haryana

- Built a **Full Stack AI tool website** using **React** with **JWT** & social logins, plus an admin panel for secure tracking and control.
- Optimized performance by cutting load time **40%** and integrated an AI chatbot for tool comparison, boosting user engagement by **30%**.
- Developed React-based event platforms with registration, gaming features, and **QR code tracking** for seamless participation.
- Created a **Field Marketing Platform** with **geo-restricted check-ins**, media sharing, gamified promotions, and a complete admin panel for reporting.
- Built a **resource-sharing system** like Google Drive with folder creation, **access permissions**, and secure collaboration.
- Designed and managed the company's **portfolio website** from scratch, adding sleek animations and **improving user experience**.

Software Engineer

Opcito Technologies

08/2022 - 04/2024

Pune, Maharashtra

- Built a **Resource Management Portal** in React with multi-user access, dynamic user flows, and feature tracking.
- Effective use of **Redux and the Context API** demonstrated mastery of state management.
- Worked on the frontend of **Journey Foods**, an ingredient and recipe platform, delivering detailed case studies, use cases, and tailored solutions
- Redesigned the entire **login/signup flow** and revamped **the landing page UI**, increasing consumer signups by **25%**.
- Developed automated **Lambda functions, SQS, SNS**, and other tools to optimize workflows while working on a cloud project to enhance **AWS** capabilities with more lucid descriptions.

SKILLS

Languages: JavaScript, Python, TypeScript

Frontend: HTML, CSS, ReactJs, NextJS, React-Native, BootStrap, TailwindCSS, Php

Backend: NodeJs, Flask

EDUCATION

BTech In Electrical Engineering

Haldia Institute Of Technology

08/2016 - 08/2020

Haldia, West Bengal

PROJECTS

Hotstar Clone

- A clone of Hotstar website using React. Hotstar is a OTT platform where you can watch movies, web series, tv series.
- Built the landing page along with Signup and Login pages and their functionalities.
- Collaborated on most parts for backend development(mostly Api's creation), implementing authentication using Node.js, Express.js and passport-google-oauth2.
- **Tech Stack:** HTML, CSS, JavaScript, ReactJs, NodeJs, Express, MongoDB.
- Features: Signup/Login, Landing Page, Individual video page, Search feature. •
